Very intense situation here at local hospital as Indian travelers after 14 day quarantine are experiencing new illness with bad symptoms. Not COVID not flu, no H5N1, neg IGm neg IGG, low red blood, insomnia, Nasaue and bloody sputum p body fluid, turn aggressive had to restrain and I'm not happy. I can answer more

>– Projected COVID-19 mutation and/or co-infection with secondary virus (referred to as COVID-21) leading to a third wave with much higher mortality rate and higher rate of infection. Expected by February 2021.

COVID-20 (mutation) is set to hit Canada in start February. This is just the "warmup" propaganda face, just like we saw with China.

I'm assuming he means negative antibodies to the listed viruses, seasonal, H5N1, and SARS2. They'd be standard tests for severe illness that isn't getting a positive on the PCR tests. H5N1 is an interesting choice, as countries test for it if there's something severe out of caution and there's some respiratory signs.

We'd rabies test anything with those symptoms, as rabies is endemic here.

Likely fake and gay, but 2020 and all that.

At least one person has died and 200 others have been hospitalised due to an unidentified illness in the southern Indian state of Andhra Pradesh.

Since then, patients have experienced symptoms ranging from nausea and anxiety to loss of consciousness, doctors said on Monday.

A 45-year-old man who was hospitalised with symptoms similar to epilepsy and nausea died on Sunday evening, the Press Trust of India news agency reported.

Officials are trying to determine the cause of the illness.

So far, water samples from impacted areas haven't shown any signs of contamination, and the Chief Minister's office said people not linked to the municipal water supply had also fallen ill.

The patients are of different ages and have tested negative for COVID-19 and other viral diseases such as dengue, chikungunya or herpes.

An expert team deployed by the Indian Government reached the city to investigate the sudden illness on Monday.

You are embarrassing yourself. The object of the exercise was to verify if what OP was stating had any evidence to support it.

This is what OP had to say:

"Very intense situation here at local hospital as Indian travelers after 14 day quarantine are experiencing new illness with bad symptoms. Not COVID not flu, no H5N1, neg IGm neg IGG, low red blood, insomnia, Nasaue and bloody sputum p body fluid, turn aggressive had to restrain and I'm not happy. I can answer more"

I just used "Mystery illness Hong Kong" in my search, I could have used any variant of this such as "Indian Travellers Illness" etc and still come back to these articles which confirmed that this is not a total LARP. You are an abomination that needs to get sterilized. You are a nation of the biggest retards on the planet.

It's NOT rabies, you guys are going by old myths. Rabies doesn't cause a 'fear of water' (hydrophobia). They called it that because rabies constricts your throat making it hard to swallow so people who had it couldn't drink fluids or even swallow their own saliva, it wasn't due to a fear. This also causes that frothing at the mouth you may see in animals with rabies. ALSO, many warm-blooded animals contract rabies and NEVER demonstrate those mad dog 'Old Yella' symptoms, they just get sick and die. Rabies does however, almost always cause light sensitivity, which makes it hard for people who have it to be in well-lit rooms. A lot of animals who have it will stagger around, look drunk, have no balance and then die.

OP is probably a LARP but this thread does raise a good question. What if this Covid bullshit makes us put our guard down against an actual deadly virus?
While we worry about some Chink meme flu the 'Big One' could sneak up on us. Docs will be too busy looking for Covid to catch on early and normies will be so sick of an obvious exaggerated response to a virus they won't take the next killer virus seriously because they'll think it's Covid 2.0.
Maybe that's (((their))) plan. We all know (((they))) plan to kill a lot of people and use the chaos to claim power.

The thing is if there's an actual deadly virus that people can see with their own eyes they become massive fascists, like if there was a virus as contagious as COVID but as deadly as the original SARS and affected all age groups you would 100% see soccer moms and everyday people supporting welding doors shut.

COVID only kills the old, and most deaths are in nursing homes, so on a day to day experiential level it doesn't SEEM like a virus is going around. I don't even doubt the death numbers either, but it's only like a 10% increase in death or whatever so it doesn't really FEEL like anything is happening. An actual, deadly virus that kills the next door neighbor or a kid from school really gets people going. This one doesn't.

It's India. Yes, there are packs of feral dogs. Or maybe these guys all got bit by the same dog. Or they're closeted gays and transmitted it in the blood (secret homosexual activity between "friends" is extremely prevalent among Indian men).

To be fair, if it was happening right now, you wouldn't hear about it for at east 24 hours officially.

Likely fake and gay, but the news is almost always quite slow with these things.

India has endemic rabies, and a human adapted form is always possible, as is a weaponized form that's human adaptable too. 2020 plays by its own rules.

Bruh, it took most of main stream American News 3 months to report on Corona in China at all, I was hearing it from Chinese sources in late December, but only Mr. Metakor and the New York Times were reporting it. It it was mentioned anywhere else in American media, it was dubbed as a "racist conspiracy theory against Chinese by Donald Trump."

Imagine thinking that the Chinese government, which also surpassed Corona information as well, would report on a new disease.
